New! STEINER Miniscope 8x22

Truly small and optically excellent.

The new Steiner Miniscope offers incredible clarity and bright images in a new pocket-sized design. With this 8x22mm monocular, no matter where you go, there is no reason to miss any of the action or adventure. Measuring just 5cm high by 5cm wide, it is small enough to travel in a pocket, purse or pack.

The 8x magnification brings you closer to the action or the view and makes it ideal for hiking, traveling, sporting events, concerts or the theater. Featuring Steiner's Sports-Auto-Focus system, once the Steiner Miniscope is focused for your eyes, everything from 20 meters to infinity will be clear and sharp. High-Contrast lens coatings deliver the same clarity and brightness found on much larger optics. So clear and bright, it is hard to believe something this good can be this small. Also it features an ergonomic design that's easy to hold and use with just one hand. Weighing in at just 80 g, it won't slow you down.

STEINER-OPTIK GmbH

STEINER-OPTIK in Bayreuth, Germany, was founded in 1947 and is now the biggest specialized producer of premium binoculars for the civil market, developed for the fields of marine, hunting, bird-, animal watching and nature observation, as well as the active outdoor usage and the military range.
